

HealthPath Diagnostics & Pathology Lab -- NABL Accredited

12 Science Park, Koramangala, Bengaluru-560095 | Ph: 080-1234-5678 | lab@healthpath.in

PATIENT & SAMPLE DETAILS

Patient Name:	Rajesh Kumar
Age / Gender:	34 Years / Male
Member ID:	EMP001
Referred By:	Dr. Rajan Sharma (Reg: KA/45678/2015)
Sample Collected:	01-Nov-2024 10:30 AM
Report Date:	01-Nov-2024 05:00 PM
Sample ID:	HP-2024-11-0087

COMPLETE BLOOD COUNT (CBC)

Parameter	Result	Unit	Ref. Range	Flag
Haemoglobin (Hb)	13.2	g/dL	13.0-17.0	Normal
Total Leucocytes (TLC)	4,200	/cumm	4000-11000	Normal
Neutrophils	58	%	40-75	Normal
Lymphocytes	36	%	20-40	Normal
Platelets (PLT)	1,05,000	/cumm	1.5-4.5 Lac	LOW
Packed Cell Volume (PCV)	39	%	40-54	Normal
MCV	82	fL	80-100	Normal
ESR	22	mm/hr	0-15	HIGH

DENGUE SEROLOGY

Test	Result	Interpretation
NS1 Antigen (Dengue)	NEGATIVE	No active dengue infection
Dengue IgM Antibody	NEGATIVE	No recent dengue infection
Dengue IgG Antibody	NEGATIVE	No past dengue infection

INTERPRETATION

CBC findings are consistent with a viral infection. Mild thrombocytopenia (low platelets) is likely secondary to the viral fever and should be monitored. Dengue serology is NEGATIVE, ruling out dengue fever. ESR mildly elevated -- correlates with fever. Recommend repeat CBC after 5 days to ensure platelet recovery.

CHARGES

CBC with Differential Count	Rs. 350
Dengue NS1 + IgM/IgG Panel	Rs. 150

TOTAL CHARGES **Rs. 500/-**
